

MODEL 100 ROTARY DRAW TUBE & PIPE BENDER

...delivers unmatched versatility, mobility and easy operation!

FEATURES and SPECIFICATIONS

- Unique ratcheting mechanism allows you to bend easily by simply pulling a lever. Each pull will deliver 10 degrees of movement.
- No Pins to move or re-engaging to reach 206 degrees; this is accomplished by the anti-reverse stop latch.
- Bends pull out in seconds (no disassembly required).
- Capacity is up to 1" Schedule 40 Pipe, 1" square tubing, 1-1/2" Chromolly (up to .083 wall), up to 1-3/4" tube (.095 wall mild steel).
- Maximum bend radius is 7" (depending on wall thickness, and material).
- Quick release counter die.
- Highly visible degree dial improves accuracy.
- Solid steel construction for durability.
- Die sets are interchangeable with all RMD benders.

Above: Heavy-duty construction and extra large degree indicator offers operator reliability and accuracy.

- All die sets are color coded for easy identification (green for pipe, blue for tube, and gray for square).
- Bend Material: Round or square tubing, pipe, flat stock, angle iron, or solid rod.
- Built to the same high quality standards as all other RMD machines.
- MADE IN AMERICA!
