

# MODEL 500 ROTARY DRAW TUBE & PIPE BENDER

...delivers unmatched versatility, mobility and easy operation!

## FEATURES and SPECIFICATIONS

- Capacity is up to 3" Schedule 40 Pipe, 3" Square Tubing, up to 4" Tube (.185 wall mild steel).
- One shot bending up to 206 degrees without stopping or ratcheting.
- Variable speed controlled by operator.
- Bends pull out in seconds.
- Unique design coupled with powerful hydraulic pump reduces production time and improves efficiencies.
- Maximum bend radius is 12" (depending on wall thickness, and material).
- Highly visible degree dial improves accuracy.
- Solid steel construction for durability.
- High quality industrial grade hydraulic system.
- Die sets are interchangeable with all RMD benders.
- High value at reasonable cost.
- Bend can be advanced after stopping machine, saves on set up costs (material savings).
- Autostop for programming bend allows for repeatable bends.
- All die sets are color coded for easy identification (green for pipe, blue for tube, and gray for square).
- Bend Material: Round or square tubing, pipe, flat stock, angle iron, or solid rod.
- Built to the same high quality standards as all other RMD machines.
- MADE IN AMERICA!
